Subject: RE: Request for Review: MKI EA Report for Seismic and Environmental Data Collection
Date: Friday, August 29, 2025 11:35:06 AM

Melissa,

Maritime Forces Atlantic Safety and Environment (MARL SE) has reviewed the *Environmental Assessment of Multiklient Invest's Newfoundland Offshore Seismic and Environmental Data Collection Program 2026-2030*. Naval operations are undertaken by the Department of National Defence in waters surrounding Nova Scotia and Newfoundland; thus, increasing the potential for cumulative effects in MKI's Study Area. It is recommended that cumulative effects of seismic and naval sonar be assessed and discussed in the report, and any updates of the report.

Subject: Request for Review: MKI EA Report for Seismic and Environmental Data Collection

Hello Everyone,

On July 22, 2025, Multiklient Invest (MKI) submitted to the Canada-Newfoundland and Labrador Offshore Energy Regulator (C-NLOER) an Environmental Assessment (EA) report for a seismic and environmental data survey in offshore eastern and southeastern Newfoundland. The report, “Environmental Assessment of Multiklient Invest’s Newfoundland Offshore Seismic and Environmental Data Collection Program, 2026-2030” describes the activities proposed for the area. The EA Report was completed in accordance with the scoping document prepared by the C-NLOER on November 1, 2024. Please note however, the proponent has updated the temporal scope to 2026-2030 from 2025-2029.

We would appreciate your review of the EA Report found at the link below. Please forward comments to me no later than October 1, 2025. If you have any questions on the attached, don’t hesitate to reach out.
